International Conference & Exhibition on
Zinc-Coated Steels in Infrastructure, Construction & Automobiles
4-5 Feb 2019, Orchid Hotel, Mumbai

Preamble

The forthcoming conference– technology & market oriented– will focus on all types of Zinc coatings: hot dip galvanizing (batch & continuous), galvalume, thermal spraying, zinc plating, zinc rich paints etc., Zinc coating provides a long, maintenance–free protection to the steel from corrosion in a number of applications such as infrastructure, automobiles, building and construction (like plumbing pipes, scaffoldings, roofing sheets, sidewalls, railings, fencing etc..) These applications will continue to grow with improved living standards as well as the overall economic growth of the country. Galvanized rebar is also a proven remedy for corrosion in RCC structures in coastal locations and aggressive areas in many countries.

With the increasing emphasis and proposed massive investments in infrastructure in India like power, telecom, highways, railways, ports, airports, renewable energy, corridor projects, smart cities, Bhartmala etc., there is a huge untapped potential for Zinc-coated steel products in these emerging segments. In addition, India has also become a major producer of automobiles; zinc–coated steel sheets are used in this sector to a significant extent in many overseas countries.

The forthcoming conference will dwell on the economic & technical advantages of zinc-coated steel products in the infrastructural, automotive and construction sectors as well as the general and continuous galvanizing, galvalume, zinc spraying, zinc plating, zinc-rich paints etc., Hence an *event, not to be missed* by the zinc-coating industry, user sectors, govt depts., construction companies, builders, architects etc.,
